SkillPath AI: Next Steps After the Server Starts

A quick guide for what to do once `npm start` prints `SkillPath AI running at http://localhost:3000`.

1. Open the website

Go to **http://localhost:3000** in Chrome or Edge.

2. Create an account

- Click **Get Started**.
- On the Register tab, enter your name, register number, department, semester and a password of at least 8 characters.
- Click **Create Account & Continue**.

3. Take the assessment

- Tick some skills, such as Python and SQL. Questions appear for each skill you tick.
- Answer all the questions.
- Choose a career goal, such as Data Analyst.
- Click **Submit Assessment & View Results**.

4. Check the dashboard

You will see your skill level, career match, skills you know and skills to learn.

5. Open the roadmap

- Click **Explore My Roadmap**.
- Tick a few tasks, then refresh the page. The progress stays saved.
- Click **Download PDF Report**.

Things to know

- **Keep the terminal open.** Closing it stops the website. To stop it on purpose, press **Ctrl + C**.
- **The JWT_SECRET message is normal in development.** The only effect is that you get logged out when you restart the server. To stop that, open `backend\.env` and change `JWT_SECRET=change-me` to any long random text.
- **The "1 high severity vulnerability" notice is not a problem for this project.** Don't run `npm audit fix --force`, because it can break the packages.
- **To run it again later,** open a terminal in the `backend` folder and run `npm start`.

For your project demo

Run `npm test` in a second terminal to show the 18 passing tests. To open a second terminal, click the **+** icon in the terminal panel. Keep the server running in the first one.

If something goes wrong

If any page shows an error or the buttons don't respond, note which page it is and what happens, then ask for help with those details.
